

PERSPECTIVES ON SCHOOL REFORM AND ACCOUNTABILITY

CHICAGO'S STORY

The Chicago Experience

- **Theory of Change**
- **Overview of PM in Action**
- **Evolution of PM and Focus on Capacity Building**

Office of Performance CPS

Theory of Change

Themes Emerged

- ✓ **Decisions needed to be made closest to the student**
- ✓ **Human capital decisions needed to be linked to performance outcomes**
- ✓ **The District needed to focus on growth, not absolutes**
- ✓ **Routines and process mattered tremendously**

Focus on Resource Allocation

- ✓ Central Office exists only to the extent that schools buy its services.
- ✓ 26 Area Offices created with total autonomy from Central Office and accountability for school performance.
- ✓ Over 1,000 positions eliminated in Central Office – resources shifted to Areas.

Focus on Leadership

Focus on Growth

- Approximately 60% of CPS students test grade level in an average year
- Need more than one year's growth for these students
- The only fair barometer for teacher effectiveness is growth

Focus on Routine

- Review of benchmark assessment data or rounds/walkthrough data with a deep dive into content/grade or instructional strategy

- As needed, CAO meets with a principal & ILT to dive deep into a variety of school measures and/or to assist in major strategy revision

- CAO/Area Team models a PM for the principal & ILT

- Principals and ILTs review of progress report data, walkthrough data, student work (across grade levels)

- Teacher teams look at student work, common grade level/course assessments & instructional tasks, peer observation data

Office of Performance 

Performance Management in Action

Questions We Wrestled With

What do we expect students to learn?

How can we best teach what we want them to learn?

How will we know if they learned?

How will we respond when they don't learn?

***Questions adapted from Richard DuFour**

Performance Management

CPS

Performance Management

- Are we achieving positive student outcomes?

Bottom-up PM System that answers...

CENTRAL OFFICE

- Are the Central Office services effective for schools?
- Are they cost-effective?
- Are resources directed at the right things?

AREA OFFICES

- Are schools making progress?
- Is money appropriately focused?
- Are the right personnel in place?
- What is the right strategy for growth?

SCHOOL/ CLASS

- Is every student making sufficient growth?
- Are the instructional strategies working to ensure every student is “on-track?”

Central Office Performance Report

Central Office departments use key performance indicators to identify strategies that will improve the effectiveness and efficiency of service provided to schools

Performance Management

Chicago Public Schools August 2010 Performance Report

Monthly Matrixes

Total Matrixes Due: 17 (Administrative: 11; Programs: 6)
Total Matrixes Submitted: 16 (Administrative: 10; Programs: 6)
Non-Compliant Departments/Other Issues:

- After School Learning – incomplete matrix
- Expulsions – incomplete matrix
- Finance – incomplete matrix
- Law – no matrix submitted (2nd consecutive month)
- Student Support & Engagement – incomplete matrix

Major Trends in Performance

Legend

Increased/Negative Trend Increased/Positive Trend New Measure
Flat Trend/Not Achieving Target Flat Trend/Achieving Target
Decreased/Negative Trend Decreased/Positive Trend

Major Trends in Performance

After School Learning:

Mayor's summer sports program had 90% attendance (2,700 students participating at 33 camp locations).

Extended Learning Opportunities:

Community Schools Initiative HS attendance rates have not been reaching the 60% target; March: 56.1%, Apr: 57.2%, May: 54.3%. Note: data cited is three months prior to current month due to consistently late data entry by the CSI coordinators.

Expulsions/Student Adjudication:

Average days from incident to expulsion increased to 132 days in July from 118 days in June (September- March: 185 days; target: 60 days). The increase in July was driven by the hearing to hearing officer recommendation step, which averaged 93 days in July versus 14 days in June and a maximum of 27 days in October (target: 10 days).

Graduation Pathways:

Several positive trends were reported by the Youth Engaged in Schools (YES) program, which serves students transitioning out of Nancy B. Jefferson:

- The percent of YES Scholars with improvement in suspension days 2nd semester increased to 42% in 2009-10 compared to 27% in 2008-09.
- The attendance rate of YES Hot 25 students improved to 73% in 2009-10 from 70% in 2008-09.
- The percent of YES Hot 25 students with GPA improvement in 2nd semester improved to 36% in 2009-10 from 24% in 2008-09.
- The percent of YES Hot 25 students with improvement in suspension days 2nd semester improved to 43% in 2009-10 from 31% in 2008-09.

New Schools:

10 charter schools must sign Board agreements for FY11 (12 schools were outstanding in June). ONS is working with Law and has communicated with all schools to meet the September signing deadline.

97% of evaluations for students with disabilities in charter/contract schools were on-time (87% in June; Target: 90%).

100% of new charter/contract school administrators have access to IMPACT as of July 30 (0% in May and June).

Performance Management

CPS

Chicago Public Schools August 2010 Performance Report

Business Service Center:

BSC resolved 96% of issues in July (meaning no escalation to SME partner required), the highest internal resolution rate BSC has ever achieved. June: 95%, Target: 90%.

Only 50% of schools submitted internal accounts reports by the due date in June, down from 82% in May (target: 95%). Due to a high number of school staff on vacation, the number of overall internal account reports submitted is lower, which decreases the % of reports submitted by deadline.

Finance (Excluding Procurement):

In June, A/P paid 91% of its invoices within 30 days (target: 83%), up from 87% in May, and the highest % paid within FY2010.

Human Capital:

The percent of principal vacancies filled by candidates from external partnerships or principal preparation programs reached 32% in July (target 30%).

The pass rate for high-potential principal candidates dropped in the third quarter to 44% from 61% (target 60%).

3.6% percent of school units had more than 30% of employees affected by a late payroll edit (target 4.3%). The prior three months saw an average of 9.6% of employees affected. The prior low was 7.9%.

Information Technology Services:

Percent of computers installed within 45 days of order dropped from 100% to 92% (Target increased in FY11 to 95% from 90%). Increase in installation time driven by a delay in the hardware builds.

Nutrition Support Services:

Labor productivity, defined as meals per labor hour, decreased from 16 in April and May to 11.3 in June (target: 16). This is due to the number of meals served decreasing in June (core participation months are Sept-May).

Procurement & Contracts:

82% of POs were received more than 5 days after the need by date in July. May: 30%, June: 54%; Target: 20%.

Real Property & Facilities:

% of CPS projects on schedule remained flat at 78% for the fourth straight month, well below the target of 90%.

Only 15% of schools scored 90-100% on AFM school assessment score (20% in previous quarter). Target is 50%.

Safety & Security:

Shootings involving CPS students were 20% lower in July 2010 than in July 2009 (target: 50% decrease).

OSSS conducted safety evaluations for 194 Track E schools (10 high schools) prior to their school start and will evaluate all Track R schools before September 7, 2010. This is a significant increase in comparison to 49 safety evaluations conducted throughout SY2009-2010.

Student Transportation:

Total accidents decreased significantly from 23 in June to 4 in July (target: 20). Only one accident was bus-fault (target: 10).

Safety complaints increased to 89 in July (52 in June, 70 in May, 71 in April). Target is 50 per month.

Example of a classroom-level report

Benefits of an adaptive assessment:

- Provides teachers with detailed information about each student's performance in reading, math and science
- Offers subjected learning objectives customized for each student that are aligned to state standards
- Pinpoints for teachers where students are at academically, even if they are above or below grade level

Office of Performance **CPS**

Evolution of PM

School PM Toolkits

School Performance Management Toolkit:

A GUIDE FOR INSTRUCTIONAL

Elementary School Edition

September 2010

School Performance Management Toolkit:

A GUIDE FOR TEACHER TEAMS

High School Edition

September 2010

Performance Management

CPS

Toolkits offer step-by-step guides for Teacher Teams and Instructional Leadership Teams on using student data to differentiate instruction. Guides offer recommendations and tools to assist schools in:

- **Creating conditions for success**
 - Setting goals
 - Choosing and developing strategic data sources
 - Developing norms and protocols for effective teamwork
- **Analyzing data**
 - Preparing data
 - Asking the right questions of data
 - Conducting root cause analysis
- **Taking action and adjusting instruction**
 - Developing meaningful action items
 - Executing and monitoring action items
 - Reflecting on effectiveness of action items and team process

CPS School Report Card

This report card is for your child's school. It tells you how the school performed during the 2009-2010 school year and how the school has been improving over time. For more information, see the back of this report or talk to your school's principal. You can also visit the website listed below.

This school's performance rating is:

☐ Excellent Standing (Level 1)
☒ Good Standing (Level 2)
☐ Low Academic Standing (Level 3)

This school's status is:

☐ Not on Probation
☒ On Probation
☐ Not Applicable

Your school's performance rating is based on the CPS Performance Policy. Your school earned 50% of the available points on the Performance Policy in the 2009-2010 school year, which places the school in Level 2. Your school must receive a Level 1 or 2 rating for a second year to be removed from probation.

Overall 2010 Performance

Improvement Over Time

☒ Below Average

☐ About the same as other CPS schools

Subject	% of students meeting or exceeding state standards in 2010	2010 Subject Performance	Improvement Over Time
Reading	24.6%	<input type="radio"/> Average	<input type="radio"/> About the same as other CPS schools
Math	29.2%	<input type="radio"/> Average	<input type="radio"/> About the same as other CPS schools
Science	21.4%	<input type="radio"/> Average	<input checked="" type="radio"/> More than other CPS schools

Reading this Report

The information on this page is based on the CPS Performance Policy. Turn to Page 2 of this report to learn more about how ratings are assigned.

More information on the Performance Policy and additional school performance data can be found at the following website:

 <http://www.cps.edu/performance>

Getting Involved

The information on this report can empower you to help improve student outcomes at your school. See page 3 to learn more about getting involved, including:

- ◆ Talking to your school's principal and teachers.
- ◆ Participating in your Local School Council (LSC).
- ◆ Attending Report Card Pickup Day
- ◆ Volunteering at the school.
- ◆ Signing up for Parent Portal to view your child's grades online.

Information Presented

- New parent-friendly report format
- Summarizes school performance
- Indicates probation status
- Ratings based on CPS Performance Policy
- AYP results also included (meets NCLB requirements)

Dashboard Guided Analysis Tools

- Automated reports provide custom analysis of key student outcome measures
- These reports are meant to assist ILTs so that they don't have to crunch their own data
- Interactive documents highlight issues by grade, classroom, and students in need of intervention
- Example metrics include attendance, student grades, and on-track status

Data Worksheet

Grade (Ds and Fs)

School	Xxxxx
Time Period	Q2, 2009-2010

Steps	Key Questions
1. Review school-wide performance	1. What is our overall school performance? <ul style="list-style-type: none"> How many students received at least one D or F?
2. Review grade-level data	2. How are we performing at each grade-level? <ul style="list-style-type: none"> At each grade level, how many students received D or F? At each grade level, how many classes are struggling? At each grade level, how many students have intervention?
3. Review classroom-level data	3. How are our classrooms performing? <ul style="list-style-type: none"> In each classroom, how many students are receiving intervention?
4. Review student-level data	4. Which of our students require support? <ul style="list-style-type: none"> How many students meet college readiness but are struggling? What kind of support do our students need?

Grades

Which students require support? What kind of support?

Instructions:

- * Fill in your current students (sorted by number of D/Fs). For example, list all of your students with 1 D/F this quarter, all your students with 2 D/Fs this quarter, etc.
- * Fill in the number of D/Fs last quarter
- * For each student, indicate what issues are affecting their performance
- * Once completed, determine appropriate intervention
- * Assign teacher or administrator to be responsible for ensuring intervention occurs

Intervention Strategy	Student	Absences Last Quarter	Absences This Quarter	Instructor Response
Strategy 1				
Strategy 2				
Strategy 3				

CTCs should use the freshman and sophomore watch lists to identify student-level attendance issues

Grades

How many students received at least one D or F over time?

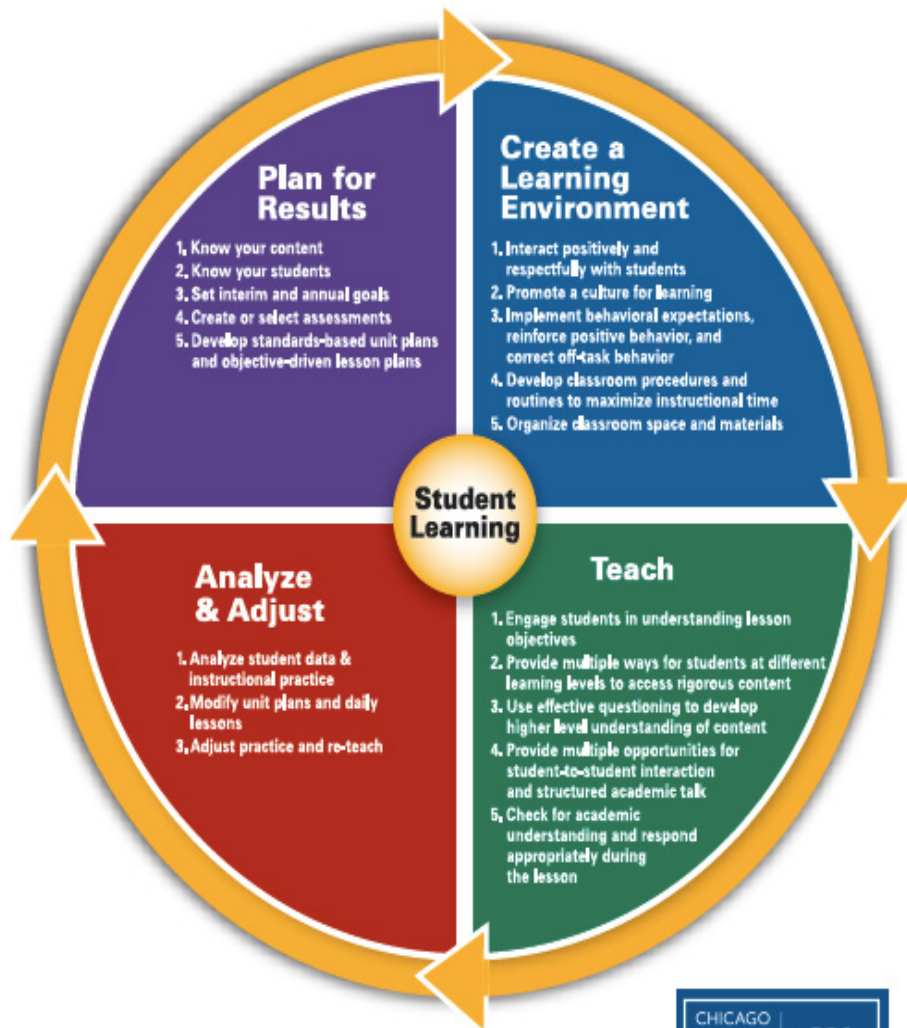

Students Receiving at Least One D or F

	Last Year	Q1	Q2	Q3	Q4
School (Last Year)	13.5%	21.7%	12.8%	19.1%	15.4%
School (This Year)	NA	20.9%	13.0%	18.8%	16.1%
Area (This Year)	XX%	XX%	XX%	XX%	XX%
District (This Year)	YY%	YY%	YY%	YY%	YY%

Reflections on This Data

- How has the number of students with a D or F changed since last year?
- How has the number of students with a D or F changed throughout this year? Is this change due to any teacher policies?
- What other aspects of student behavior may be contributing to poor grades (eg, low attendance, misbehavior, etc.)?

Teaching for Learning Framework

- ✓ Creating a CPS shared language of good teaching
- ✓ Providing clear expectations for teachers
- ✓ Providing tools for coaching and providing feedback on the quality of instruction
- ✓ Focusing on what matters most: *improved student outcomes*

Teaching for Learning Framework

CPS Teaching for Learning Framework Rubric

Draft: October 22, 2010

Teaching for Learning Framework Rubric: *Create a Learning Environment*

LE1: Interact positively and respectfully with students

LE 1		Level 4	Level 3	Level 2	Level 1
		Teacher is highly effective at interacting positively and respectfully with students	Teacher is effective at interacting positively and respectfully with students	Teacher is partially effective at interacting positively and respectfully with students	Teacher is ineffective at interacting positively and respectfully with students
		There is evidence that the teacher has strong, individualized relationships with students. The teacher has a positive rapport with all students, as demonstrated by displays of positive affect, evidence of relationship building, and expressions of interest in students' thoughts and opinions.	The teacher has a meaningful rapport with most students, as demonstrated by displays of positive affect, evidence of relationship building, and expressions of interest in students' thoughts and opinions.	The teacher may have a positive rapport with some students, but not others, or may demonstrate little rapport with students.	There may be little or no evidence of a positive rapport between the teacher and the students, or there may be evidence that the teacher has a negative rapport with students.
		Interactions among students are both positive and respectful. Students actively seek one another's assistance and support for learning.	Interactions among students are mostly positive and respectful. Students may seek assistance and support from those they are most familiar.	Some interactions among students are sometimes negative and disrespectful. Students rarely seek assistance from one another.	Interactions among students are often negative and disrespectful. Students avoid working with one another.
		Teacher cultivates and maintains a classroom culture that is explicitly based on respect.	Teacher seeks to develop a classroom culture that is based on respect.	Teacher may attempt to build a classroom culture that is positive.	Teacher does not attempt to develop a classroom culture. In several cases, students are overtly criticized or ostracized by their peers based on personality, ability, or culture.
		Teacher and students clearly value individual personalities, abilities, and cultures.	Students do not overtly criticize or ostracize their peers based on personality, ability, or culture.	Most of the time, students do not criticize or ostracize their peers based on personality, ability, or culture.	For example, there is frequent use of sarcasm, put-downs, or Conflict by both teacher and students.

PERSPECTIVES ON SCHOOL REFORM AND ACCOUNTABILITY
